People's Energy Plan

The Vision:

- PECO will transition to 100% affordable, renewable energy.

What We Won:

- **New way of doing business:** PECO will enter into its first ever Power Purchase Agreement (PPA) for actual solar energy – not just energy credits.
- PPAs are 10-year **long term contracts**.
- **More solar energy** on the grid: PECO's PPA will result in a new 25 MW solar facility.
- Although 25 MW is small, (equal to 5,000 solarized homes), this **proof of concept** opens the way for the solar energy we need.
